Prerequisites

Before submitting, ensure the following:

1. **Google Antigravity** is downloaded and set up
   → Refer: Google Antigravity Documentation

2. **Git is installed and configured on your system**
   → Refer: Set up Git

3. **You have an active GitHub account**
   → If you want to create a new account, refer to: Create a GitHub Account

---

Important Rules

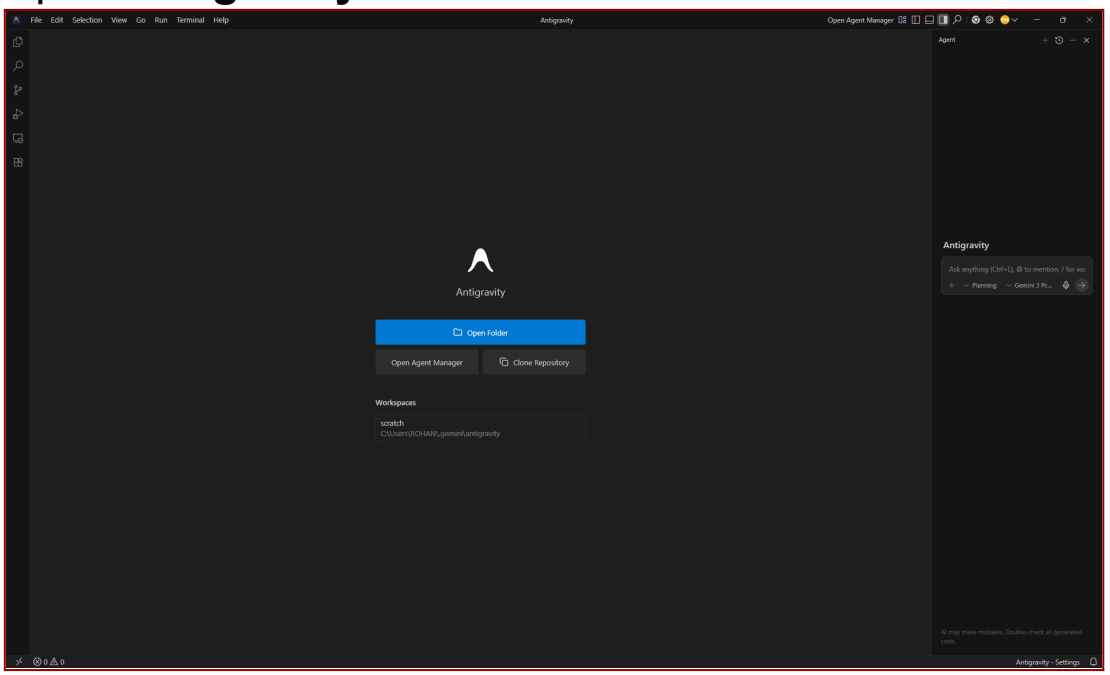
- *You have **a maximum of 3 submission attempts***
- *The **repository size must be less than 10 MB***
- *The **GitHub repository must be public***
- *The repository should contain **only one branch** (no multiple branches allowed)*

Steps to Make a Submission

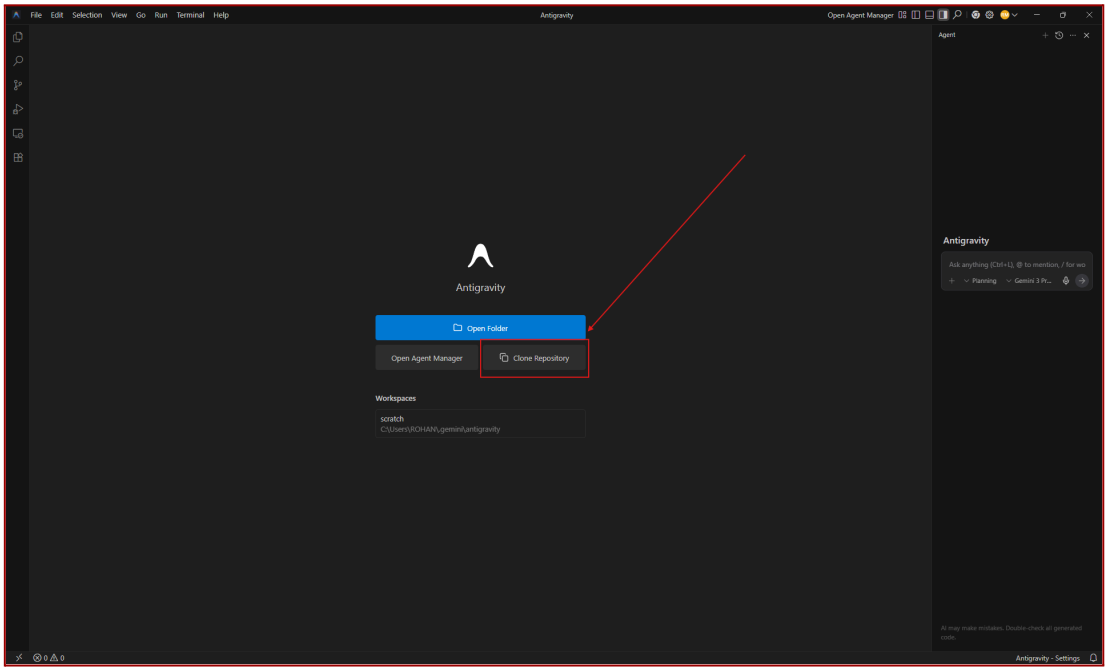
1. Go to **GitHub** and create a **new repository**

   - **How to guide refer: Creating a new repository - GitHub Docs**
   - Ensure the repository is **public**

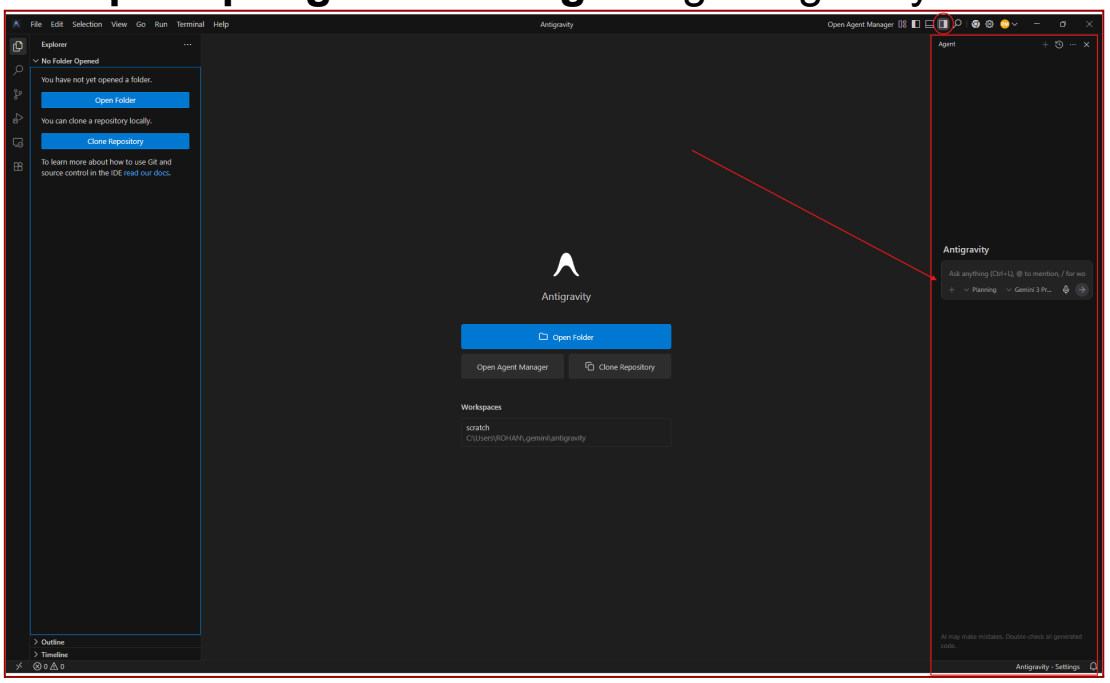
2. Open **Antigravity**



3. **Clone the GitHub repository** inside Antigravity



4. Start **prompting and coding** using Antigravity



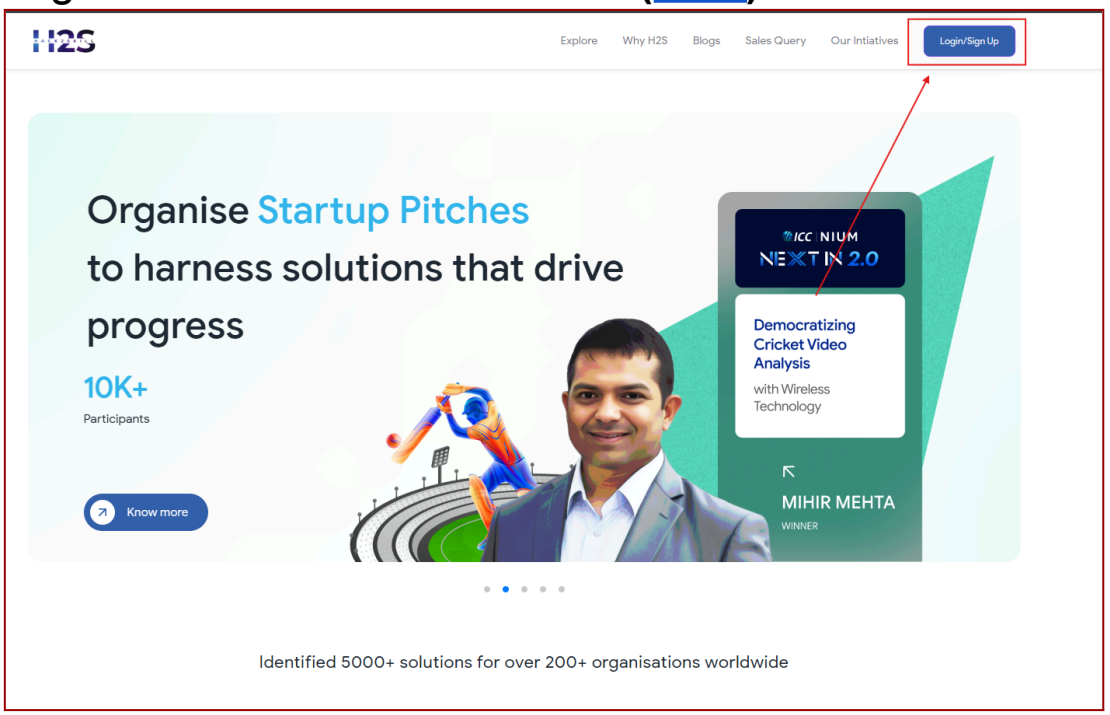
5. Once satisfied with your progress:

   - **Push your code** to the GitHub repository
   - Ensure there are **no multiple branches** (all work should be in a single branch)

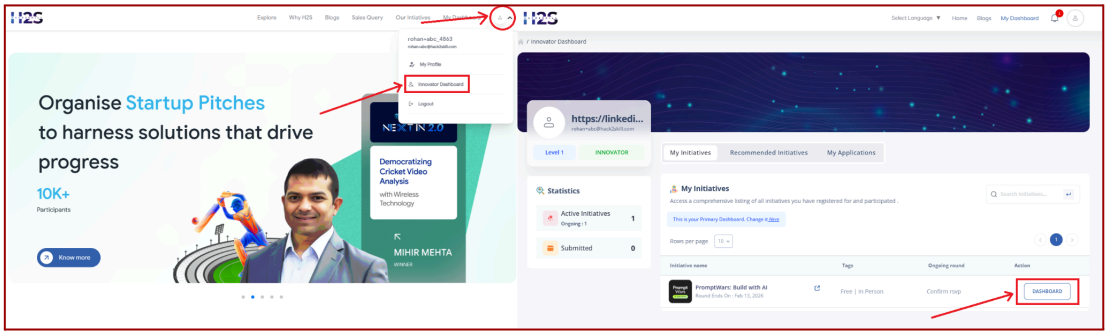
6. After pushing the code:

   - Copy the **public GitHub repository link**

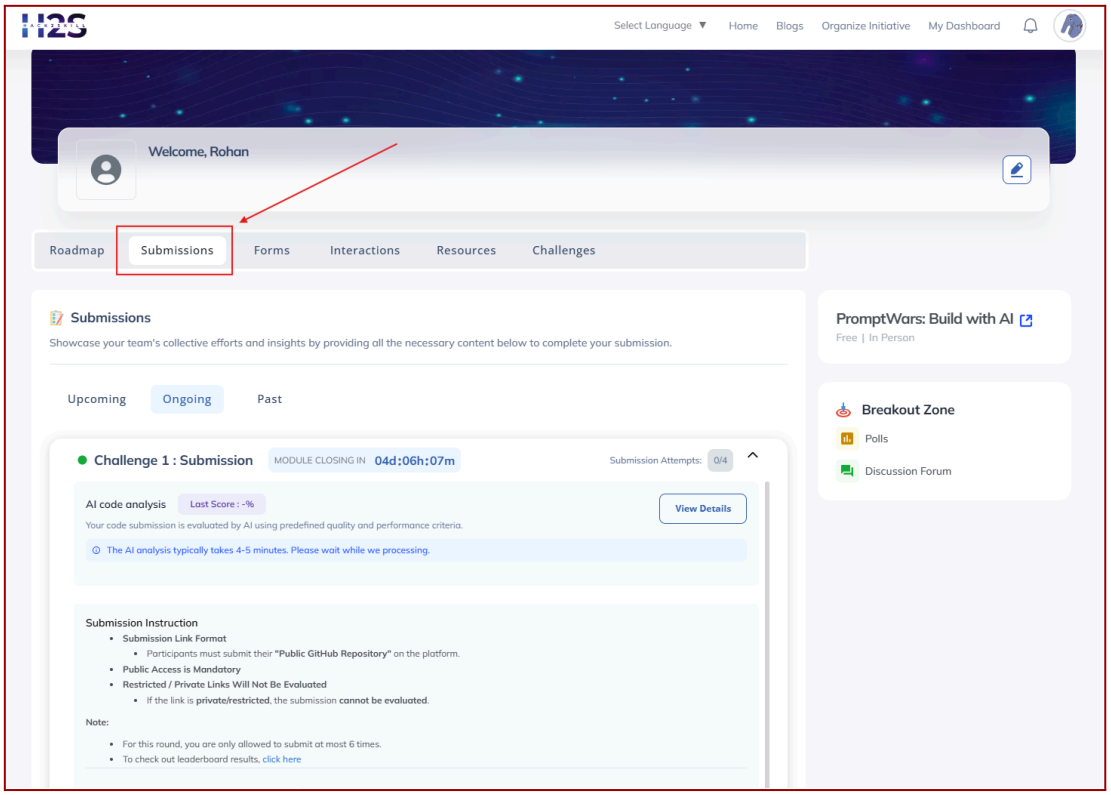
7. Log in to the **Hack2skill Portal (Link)**

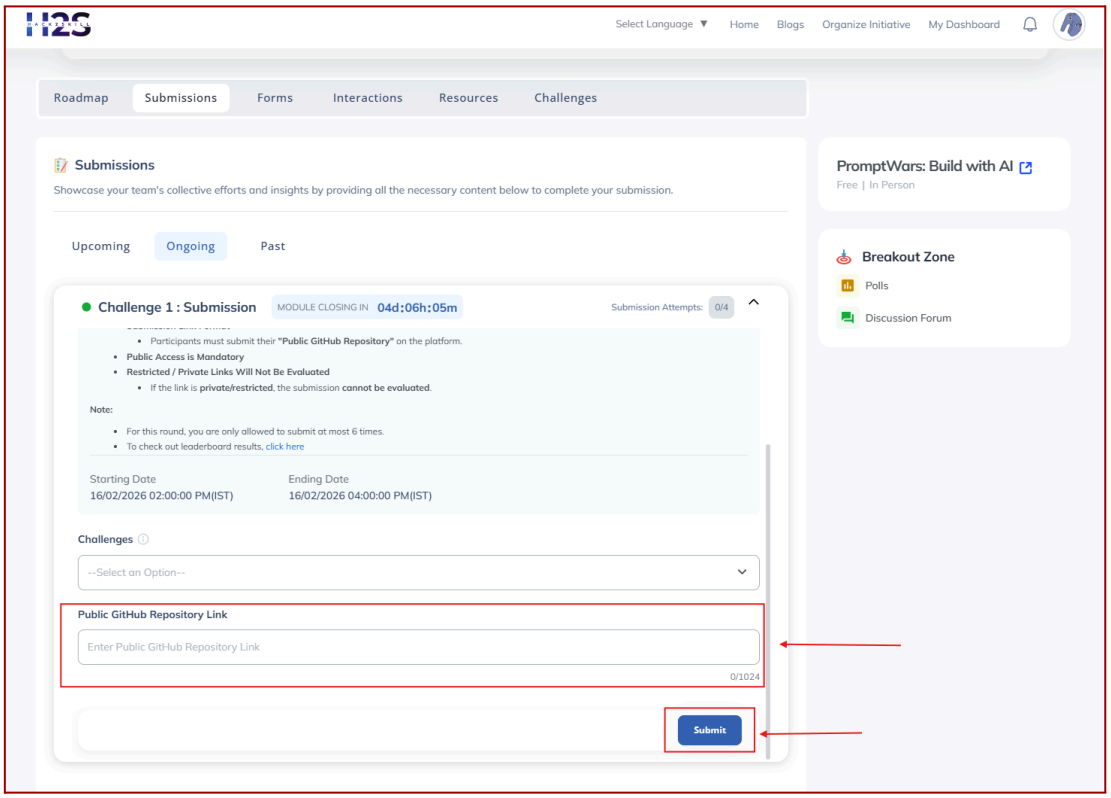


8. Navigate to the **Prompt Wars Dashboard (Link)**



9. Go to the **Submissions Tab (Link)**





10. **Scroll down slightly to see the submission fields and the submit button**
